

COMPANY OVERVIEW

The Agyeman Group helps federal agencies run accurate, auditable FISMA reporting, from the quarterly data call through CyberScope submission and the leadership briefings that follow. Led by a practitioner with 15+ years in federal cybersecurity compliance.

CORE COMPETENCIES

- CIO FISMA metrics data calls
- CyberScope submission support
- CDM data reconciliation
- Trend analysis & exec briefs
- OMB and CISA communications
- RMF & ATO lifecycle support
- Inventory, HVA & POA&M
- Power Platform automation

SERVICE OFFERINGS

- 1 Data Call Assessment**
Map today's data call and deliver a modernization roadmap.
- 2 Data Call Build**
A guided, per-system collection app in your M365 environment.
- 3 Pre-Submission QC & Reconciliation**
Validate metric values and CDM alignment before submission.
- 4 Post-Submission Analysis & Briefing**
Quarterly trends, leadership briefs and submission memos.
- 5 Annual FISMA Report Support**
Data consolidation and narrative drafting for the annual report.

DIFFERENTIATORS

- **Practitioner-led.** Hands-on experience running the quarterly CIO FISMA metrics cycle at a federal department.
- **Built for the metrics.** Focused on the CISA reporting workflow, not a generic GRC module.
- **Works with your tools.** No new platform to buy or authorize.
- **Federally vetted.** Principal has held Public Trust positions at federal agencies.
